

## Seat for volleyball referee

PY011

Volleyball referee seat, designed with the latest CAD technology and made of circular steel tubes.

The volleyball referee seat for high level competition comprises of a main structure with a metallic base that has a telescopic post to adjust the height of the seat and footrest for the referee.

The base, made of steel profile and plate, is characterized by giving the stability necessary for using the seat. It has two nylon rear wheels for easy transport once it's flipped. The sides of the main structure serve as ladders to access the seat and the footrest. The top part of the main structure serves a side protection to improve the security of the referee once he is seated. In front of the chair and on the base, a protective metallic barrier is placed to allow the referee to stand up.

Both the seat and the footrest are made of wood veneer. They are fixed to a telescopic height adjustable using a lever that activates an internal mechanical system

The footrest of the main structure is used as a guide to prevent lateral movements that could damage the seat lift mechanism.

The MONDOSEAT 3 type, with seat and backseat in injected polypropylene à, has an ergonomic design and is highly resistant to U.V. rays and atmospheric conditions.

All fasteners are made of steel and have been subjected to zinc treatment.

The seat is shipped fully assembled.

The product is painted with polyester powder paint, which is applied after a degreasing treatment using a pressurised phosphate bath and cured in an oven at 200°C.

Standard colour: Blue, red, yellow

Standard MONDOSEAT 3 colour: Blue CS6
